Specific Hazard Arising from the Chemical May cause allergic respiratory reaction.

Protective Equipment and Precautions for Self-contaminated breathing apparatus and standardFirefightersstandard turn-out apparel.

Section 6: Accidental Release Measures Personal Precautions	For personal protection see section 8.
Environmental Precautions	Collect spillage.
Methods for Cleaning Up	Avoid formation of dust and aerosols. Spilled preparation should be removed immediately to avoid formation of dust from dried preparation. Take up by mechanical means preferably by a vacuum cleaner equipped with a HEPA (High Efficiency Particulate Air) filter. Flush remainder carefully with plenty of water. Avoid splashing, high pressure washing or compressed air cleaning to avoid formation of aerosols. Ensure sufficient ventilation. Wash contaminated clothing.

For personal protection see section 8

Section 7: Handling and storage	
Handling	Avoid formation of dust and aerosols.
	Ensure adequate ventilation.
	Liquid enzyme preparations are dust free preparations.
	However, inappropriate handling may cause formation of

dust or aerosols.			
Storage	Keep tightly closed in a dry and cool place. Temperature 0-25°C (32-77°F)		
Storage Conditions	In unbroken packaging – dry and protect from the sun. The product has been formulated for optimal stability. Extended storage or adverse conditions such as higher temperatures or higher humidity may lead to a higher dosage requirement.

Engineering Controls	Ensure adequate ventilation, especially in confined areas. Maintain good conditions of industrial hygiene. Some processes may require enclosures, local exhaust ventilation, or other engineering controls to control airborne levels. Additional handling and healthy/safety information is available upon request.
Personal Protective Equipment	
Respiratory Protection	In case of insufficient ventilation wear suitable respiratory equipment that meets HEPA/P100 specifications.
Eye Protection	Wear safety glasses with side-shields (or goggles).
Skin and Body Protection	No special technical protective measures are necessary.
General Hygiene Consideration	Handle in accordance with good industrial hygiene and safety practices.
