First Aid	Remove person to fresh air. If signs/symptoms continue, get medical attention. Show this safety data sheet to the doctor in attendance.
Skin Contact	
Effects	May cause slight irritation.
Symptoms	Slight irritation.
First Aid	Remove and wash contaminated clothing before re-use. Wash off
	immediately with plenty of water. If symptoms persist, call a doctor.
	Show this safety data sheet to the doctor in attendance.
Eye Contact	·

	doctor. Show this safety data sheet to the doctor in attendance.

# SECTION 5: Firefighting measures

Flammable Properties	Slightly flammable according to HMIS criteria.
Suitable Extinguishing Media	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
Unsuitable Extinguishing Media	None
Hazardous Combustion Products	None
Specific Hazards Arising from the Chemical	May cause allergic respiratory reaction
Protective Equipment and Precautions for Firefighter	s Self-contained breathing apparatus and standard turn-out apparel.

# SECTION 6: Accidental release measures

Personal Precautions	For personal protection see section 8.
Environmental Precautions Methods for cleaning up	Collect spillage. Avoid formation of dust and aerosols. Spilled preparation should be removed immediately to avoid formation of dust from dried preparation. Take up by mechanical means preferably by a vacuum cleaner equipped with a HEPA (High Efficiency Particulate Air) filter. Flush remainder carefully with plenty of water. Avoid splashing, high pressure washing or compressed air cleaning to avoid formation of aerosols. Ensuresufficient ventilation. Wash contaminated clothing.
Other Information	For personal protection see section 8.

# SECTION 7: Handling and storage

Handling	Avoid formation of dust and aerosols. Ensure adequate ventilation. Liquid enzyme preparations are dust free preparations. However, inappropriate handling may cause formation of dust or aerosols
Storage	Keep tightly closed in a dry and cool place. Temperature 0-25°C (32-77°F)
Storage Conditions	In unbroken packaging - dry and protect from the sun. The product has been formulated for optimal stability. Extended storage or adverse conditions such as higher temperatures or higher humidity may lead to a higher dosage requirement.

# SECTION 8: Exposure controls/personal protection

#### **Occupational exposure controls**

Engineering Controls	Ensure adequate ventilation, especially in confined areas. Maintain good conditions of industrial hygiene. Some processes may require enclosures, local exhaust ventilation, or other engineering controls to control airborne levels. Additional handling and healthy/safety information is available upon request
Personal Protective Equipment	
Respiratory Protection	In case of insufficient ventilation wear suitable respiratory equipment that meets HEPA/P100 specifications.
Eye Protection	Wear safety glasses with side-shields (or goggles)
Skin and body protection	No special technical protective measures are necessary
General Hygiene Considerations	Handle in accordance with good industrial hygiene and safety practices
Environmental exposure controls	Local authorities should be advised if significant spillages cannot be contained
