## 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions For personal protection see section 8

**Environmental Precautions**Collect spillage.

Methods for cleaning up Avoid formation of dust and aerosols.

Strive X Page 4 / 8

Revision date: 2024/11/28

Spilled preparation should be removed immediately to avoid formation of dust from dried preparation. Take up by mechanical means preferably by a vacuum cleaner equipped with a HEPA (High Efficiency Particulate Air) filter. Flush remainder carefully with plenty of water. Avoid splashing, high pressure washing or compressed air cleaning to avoid formation of aerosols. Ensure sufficient ventilation. Wash

contaminated clothing.

**Other Information** For personal protection see section 8.

#### 7. HANDLING AND STORAGE

**Handling** Avoid formation of dust and aerosols.

Ensure adequate ventilation.

Liquid enzyme preparations are dustfree preparations

However, inappropriate handling may cause formation of dust or aerosols

Storage Keep tightly closed in a dry and cool place. Temperature 0-25 °C (32-77 °F)

Storage Conditions In unbroken packaging - dry and protect from the sun. The product has been formulated for optimal

stability. Extended storage or adverse conditions such as higher temperatures or higher humidity may

lead to a higher dosage requirement.

#### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Derived Minimal Effect Level (DMEL)

Occupational exposure controls

**Engineering Controls** 

Ensure adequate ventilation, especially in confined areas.

Maintain good conditions of industrial hygiene. Some processes may require enclosures, local exhaust

ventilation, or other engineering controls to control airborne levels. Additional handling and

healthy/safety information is available upon request

**Personal Protective Equipment** 

Respiratory protection

In case of insufficient ventilation wear suitable respiratory equipment that meets HEPA/P100

specifications

Eye Protection

Skin and body protection

Wear safety glasses with side shields (or goggles) No special technical protective measures are necessary

General Hygiene Considerations Environmental exposure controls Handle in accordance with good industrial hygiene and safety practice Local authorities should be advised if significant spillages cannot be contained
